Property Marketing Services | Urban Angles

Canonical: https://www.urbanangles.com/services/

Details:

We cover the whole visual campaign — photography, video, drone and aerial, 3D visualisation, and floor plans and virtual services — so agencies, builders, developers, architects and private vendors can run a property campaign through one supplier and one workflow.

Our five service families

Service	What it covers
Photography	Residential, Architectural, Commercial, Builder, Lifestyle, Portrait and Corporate photography.
Video	Social trailers, showcase films, prestige productions and fully custom work.
Drone and aerial	Location, scale, outlook and site context, day or dusk.
3D visualisation	Photorealistic facades, interiors, streetscapes, builder renders and land estates.
Floor plans and virtual services	Plans, Virtual Styling, Virtual Dusk, 360 tours, retouching and studio hire.

Photography

Our published specialisations are Residential, Architectural, Commercial, Builder, Lifestyle, Portrait and Corporate photography.

Our product guide lists Day Photography packages with five or more delivered images and Dusk Photography packages with ten or more . It lists sky replacement, enhancement of existing grass, trees, pools and ocean tones, fireplace effects and appliance-sticker removal for both; colour and exposure balancing is also listed for Day Photography. Confirm your booked image count and retouching scope. The guide’s on-site selection and next-day wording is qualified by the proofing and business-day delivery process below.

Our Help FAQ describes Prestige as the base standard, with proofing selected separately. The Urban Angles Way also uses Standard, Rental and Prestige package labels. Confirm proofing on the product you book rather than relying on its name.

Video

Four published products, differing in crew, time on site and runtime:

Social Property Trailer — up to 1 hour on site, 45–60 seconds, up to 15 shots, one 30-second horizontal and one 30-second vertical Social Media Edit

Showcase Property Video — 1–2 hours on site, 45–90 seconds, optional agent introduction, 10–15 second social edit

Prestige Property Video — three crew, music, prestige colour grading, a 2–3 minute feature and three 15-second teasers

Custom Property Video — scripting, interviews, time-lapse, motion graphics and more, scoped per project

Video requires a separate booking from photography and floor plans.

Explore video

Drone and aerial

Horizon, orbital and overhead viewpoints, with named products including Points of Interest Maps, Drone Markups and View Shots. We supply images in print-resolution and web-optimised formats, delivered the next business day after selections.

We state that our drone operations follow CASA regulations with risk assessments and professional insurance.

Explore drone and aerial

3D visualisation

Our guide describes renders built from CAD files or 3D models. Two related activities are involved: 3D modelling creates the geometry, materials and scale; 3D rendering applies lighting, texture and context.

Three output types:

Rendered stills for websites and collateral

Animated sequences for campaigns

Immersive walkthroughs of a design or space

Coverage spans single-home facades, multi-unit developments, mixed-use and shopping-centre projects, builder renders kept consistent across design styles, and land estates rendered as complete communities with shopping, schools, parks and people.

Small residential projects often take a few days; larger or multi-stage developments can take longer. Accelerated work may be possible by prioritising rendering, post-production and review. Confirm feasibility, inputs, review rounds and the delivery date for your project.

Explore 3D visualisation

Floor plans and virtual services

Floor plans and site plans — fully customisable, branded and styled to your business, colour or black-and-white, supplied portrait and landscape, with a Land Box overlay available. Files arrive by close of business the business day after measuring.

Virtual Styling — digital furniture and finishes for vacant spaces, drawing on an extensive styling library with multiple international design influences, realistic shadows and highlighting, and the ability to replace existing furniture. Our FAQ specifies an additional 24 hours after initial retouching. Our guide also advertises 48 hours without the same starting point; confirm the complete booking schedule.

Virtual Dusk — a twilight treatment applied to an existing daytime exterior: dusk sky, illuminated windows, exterior lighting switched on, sunlight shadows reduced. Purchased per image. Our FAQ specifies an additional 24 hours after initial retouching. Our guide also advertises 48 hours without the same starting point; confirm the complete booking schedule.

Virtual Reality 360 — Matterport-based 3D tours with VR support, hotspot points describing fixtures and finishes, integrated video links and custom branding. We also publish a separate iGUIDE offering.

Image retouching — from tonal and colour correction through to de-cluttering and rebuilding gardens, available within our post-production offering and photography packages; confirm acceptance of client-supplied imagery and the booked scope.

Our published starting prices

Category	Published starting point
Photography	From $165
Video	From $440
Floor plans and virtual services	From $75
Creative services	Price on application

These are category entry points, not a price for every package. Our quoted prices exclude GST; the usual invoice payment period is 14 days from the invoice date, subject to the written quote or notified arrangements.

Turnaround at a glance

These are published operating estimates. Confirm the deadline for your order; our terms make delivery dependent on full instructions and do not guarantee estimated dates.

Product	Timing
Standard photography	Close of business the business day after the shoot
Photography with proofing	Close of business the business day after selections; submissions after 5 pm count as next-business-day receipt
Floor plans	Close of business the business day after measuring
Social and Showcase video	First draft, two business days after filming
Prestige and Custom video	First draft, three business days after filming
Virtual Styling and Virtual Dusk	An additional 24 hours after initial retouching

We can deliver Express photography and floor plans before midday on the next business day for an additional charge. Request Express when ordering and before the booking. Our FAQ specifically requires at least 48 hours' notice for photography; confirm the required notice for floor plans. Express is not available for video.

Our clients: who we work with

We partner with real estate professionals, builders, developers, advertising agencies and brands across Australia — from large national operators to boutique studios and solo vendors — and every client receives the same attention to detail, care and customer experience regardless of account size.

Real estate agencies — single listings or a repeatable program across offices

Home builders — display homes, ranges and design centres

Developers and project marketers — off-the-plan, land estates and staged launches

Architects and designers — completed work and pre-construction visualisation

Advertising agencies, commercial teams and brands — spaces, people and brand content

Private vendors — one property, coordinated with the agent

What services does Urban Angles offer?

Five families: photography, video, drone and aerial imagery, 3D visualisation, and floor plans and virtual services. They can be combined into a single campaign through one supplier and one workflow.

Where does Urban Angles operate?

Australia-wide, with teams on the ground in Melbourne, Sydney, Brisbane and Adelaide. Tasmania and Perth are serviced on request. National coverage does not imply identical turnaround or travel costs in every location.

What is included in photography?

The product guide lists day packages with five or more delivered images and dusk packages with ten or more. Both list sky replacement, enhancement of existing grass, trees, pools and ocean tones, fireplace effects and appliance-sticker removal; day photography also lists colour and exposure balancing. Confirm your booked count and scope. With proofing, select through DREAM; without it, the photographer selects. Standard delivery is by close of business the business day after the shoot, or after submitted selections for proofed work; selections after 5 pm count as received the next business day. The photography categories cover residential and real estate, commercial, builder and architectural, aerial and drone, lifestyle, and portraits.

Does photography include proofing?

Proofing is optional in the Help FAQ: you select which images proceed to post-production through DREAM; without proofing, the photographer selects. The FAQ calls all photography Prestige at base level, while The Urban Angles Way uses older package labels. Confirm proofing on the booked product rather than assuming the Prestige name includes it.

What video products are available?

Four: the Social Property Trailer (up to one hour on site, 45–60 seconds, up to 15 shots, horizontal and vertical social edits), the Showcase Property Video (1–2 hours on site, 45–90 seconds, optional agent introduction), the Prestige Property Video (three crew, a 2–3 minute feature and three 15-second teasers) and the Custom Property Video, scoped per project.

When is video delivered?

First draft by close of business two business days after filming for Social and Showcase, and three business days for Prestige and Custom. For Prestige and Custom, colour grading happens after the final draft is approved — so approval sits between the first draft and the finished file. Confirm the final delivery deadline for your product rather than assuming a fixed elapsed time.

Can video be booked with photography?

Photography, floor plans and video can belong to one DREAM order, but video needs a separate production booking. Photography and floor plans can share an appointment. Express is not available for video.

What does 3D visualisation cover?

Our product guide describes photorealistic renders built from CAD files or 3D models. Modelling creates geometry, material definitions and scale; rendering applies lighting, texture and context. Outputs include rendered stills, animated sequences and immersive walkthroughs, covering facades, interiors, streetscapes, builder renders and land estates. Confirm inputs and the production/review process for the project.

What are the published starting prices?

Photography from $165, video from $440, floor plans and virtual services from $75, and creative services price on application. These are category entry points, not a price for every package or inclusion. Quoted prices exclude GST, quotes may change on 14 days' notice, and the usual invoice payment term is 14 days from invoice, subject to the written quote or notified arrangements. Request a current written quote.

How do I order and track work?

Through DREAM, Urban Angles' Digital Real Estate Asset Manager — ordering, scheduling, team access, favourites, proof selection, amendment markups, delivery and order tracking in one place. Image amendments use markup pins in DREAM; video comments go through Vimeo. Completed files are retained for about 90 days, so download and store your own copies.
